

SUMMARY BOX

Account name

Fixed Term e-Bond Maturity

What is the interest rate?

The interest rate is dependent on the balance in your account.

Account Balance	Interest rate AER/gross p.a. (variable)
£1 - £9,999	0.01%
£10,000 - £49,999	0.03%
£50,000+	0.05%

Interest is calculated daily and paid annually at the end of the day before each anniversary of the account opening and on the date your account is closed.

You can choose to have interest paid to you by having it added to your account, or by asking us to pay it into a different Nationwide current or savings account (as long as it is possible to make interest payments into that account) or a current account with another building society or bank.

Can Nationwide change the interest rate?

Yes, the interest rates are variable.

Please see the “Variation of your interest rate and other account terms and conditions” and “How will we tell you about interest rate changes?” sections of the **Savings General Terms and Conditions** which set out when we can vary the interest rate and how and when we will notify you if this happens.

What would the estimated balance be after 12 months based on £1,000, £10,000 and £50,000 deposits?

Initial deposit	Interest rate AER/gross p.a. (variable)	Balance after 12 months
£1,000	0.01%	£1,000.10
£10,000	0.03%	£10,003.00
£50,000	0.05%	£50,025.00

The estimated balances are for illustration only and assume that:

- interest is paid into the account
- no further deposits or withdrawals are made
- there is no change to the interest rate.
